

Postdoc funding opportunities, Aberystwyth University, UK

Dear Fellow Oat Workers,

Aberystwyth University has been awarded a series of post-doctoral fellowships (Ser Cymru COFUND Fellowship programme, [further details attached](#)). This is a competition for 3 year post doc fellowships for people qualifying as Experienced Researchers at the time of the deadline; i.e., they must be in possession of a doctoral degree (or have at least four years of full time equivalent research experience) plus approximately 3 – 5 years postdoctoral research experience with excellent publication records. The first stage involves submitting a one page outline of a project but most important is the publication record of any potential fellow. The deadline for the outline application is the 27th of June but early submission is advisable. Do you know anyone who might be interested? It would be excellent if we were successful in increasing the number of people working on oats in this way. Please pass this information on to anyone you think might be appropriate and suggest they contact us for further information.

Kind regards,
Catherine Howarth
