

23rd Breakfast Cereal Conference, Germany

On 12 and 13 March 2024, the Arbeitsgemeinschaft Getreideforschung e.V. (Grain Research Working Group) organized the 23rd Breakfast Cereal Conference. Many topics were oat related. Forty participants from Switzerland and Germany took part in the very interesting conference program, which focused on raw materials, nutrition, food sensory analysis, technology, undesirable substances, and precautionary measures. The AGF Cereal Nutrition Committee, headed by Prof. Dr. Hampshire, was responsible for compiling the conference content.

A detailed summary of the contents, including abstracts, can be found [in the conference brochure](#) (in German).
